

Installation

- 1) **PostgreSQL installation:** go to <https://www.postgresql.org/> and install postgresQL in your computer.

Create a postgresql password and save it for your own record.

The Stack Builder you can select the applications to install later. For now, restart your computer to complete the postgresql installation.

<https://dbeaver.io/>

***OPTIONAL DBeaver installation:** Go to <https://dbeaver.io/> and install the Database tool DBeaver
